The limited edition J19 sculpture range is many things — each piece is an artwork, a sculpture, an objet d’art. Created by BEATRIX ROWE., J19 sculptures are made to inject life, form, craftsmanship and creativity into interior spaces. “From conception to construction, we wanted to design a range that is beautifully simple, versatile, affordable and celebrates craftsmanship,” says Beatrix. The J19 range of handmade objects includes three wall hung, three freestanding and three leaning designs. Each piece is intentionally designed for longevity, individually stamped with a unique number and is able to work alone or as part of other J19 pieces. They are designed to interact with their interior surroundings, adding a layer of creative joy and play with light and shadow. Shortlisted for the IDEA Awards.
